

Crowd sourcing is future of technology, says expert

Ahmedabad: Crowdsourcing is the future of technology and will have the greatest impact on the economy in the future, said Dr Lalitesh Katragadda, creator of Google Maps and Google transliteration. Speaking at Pandit Deendayal Petroleum University's School Of Liberal Studies on Tuesday, the former Google employee, Dr Katragadda told students how information technology is changing the world.

Dr Katragadda spoke at length on the concept of crowd sourcing and how it is going to play a vital role in taking the internet to the entire human population. Speaking about robotics, he gave examples of how companies are moving towards robotic technology. "This is challenging employment generation and current and future societies and governments will need to address this seriously," he said. TNN
